The M Period for Reply	AILING DATE of this communicatio	n appears on the	e cover sheet with the c	orrespondence ad	ldress			
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Wittrisch, U.S. 5,305,830.

Wittrisch discloses in figure 2A a sensor (at 4; col. 5, lines 13-28), an elongated transmission element (6,10), a transfer device (11) comprising a reel and a support piece (15).

Claims 1 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Vann, U.S. 6,497,281.

Vann discloses all the claimed limitations including a sensor (42) cable (24) and storage reel (48) driven by an electrical motor (M).

Claims 1 and 7 are rejected under 35 U.S.C. 102(b) as being anticipated by Divens, U.S. 5,729,206.

Divens discloses all the claimed limitations including the handle (23) of a reel (21) for a flexible element (10) of a water well.

Claims 1, 2 and 9-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Kostelnicek, U.S. 3,904,840.

Kostelnicek discloses all the claimed limitations including a frame (14) or derrick, a transfer device (36,37) for moving a sensor (21) through a protective element (12) having conical sections or joints (15) and includes means (16) for moving. Kostelnicek discloses a container (26) for storing the transmission element (22) in settled radial rolls (fig 2); wherein the sensor (21) is arranged a drill pipe section inherently capable of being a part of a rock drill to charge into a rock formation.

Allowable Subject Matter

Claims 14-16 are allowed.

Response to Arguments

Applicant's arguments filed 17 June 2008 have been fully considered but they are not persuasive.

Applicants should note the prior art sensors are removable and capable of taking subterranean measurements.

Wittrisch discloses in figure 2 all the structure of applicants figure 2 wherein the upright sub 15 is comparable to the protective device.

Vann discloses a sensor inherently capable of measuring a parameter of a drilled hole below the wellhead or protective device. The claims anticipated by Vann do not give life to the preamble of the base claim.

The sensor of Divens may monitor water level in the monitoring pipe as well as the well vault.

Kostelnicek sensor as argues is lowered into the drill string and as such is inherently capable of being removed and lowered into a drilled hole.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth Thompson whose telephone number is 571 272-7037. The examiner can normally be reached on 6:00 am - 2:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David J. Bagnell can be reached on 571-272-6999. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
